Dear Mr Martínez,

We send you this email to report our progress with the vertical stories.

The team have completed the first and the second vertical stories, about the user register and the interface of the game. Now we need to work in the next step and finish the upcoming vertical story, the creation of labyrinth. We will work on this part all the month, and we expect to finish it at time.

Next week, we will meet to show all the work done and discuss the possibles improvements and the updates of the project.

Sincerely,
